QUESTION : 02

The suitable model will be SVN (Subversion)

Why:

1. Lightweight copy Branching.
2. Concurrent development
3. Atomic commits.
4. Merge support
5. Version labeling

Why these not:

- RCS:

- Mainly works on single files
- Does not properly support branching and merging for teams.

- CVS:

- supports concurrent work,
- But does not support atomic commits

- IEEE:

- Its a standard documentation model
- No a version control system
